※ Please create directories that are in the "Path" column and set their permissions as the "Permission" column as the following list.
Please set shared directories so that they can be read/written from other servers.

Path	Permission	Share target server								Notes
		DBMS	backyard	Ansible	Ansible Tower	Cobbler	OpenStack	Terraform	Web/AP	
/(Desired shared directory)/data_relay_storage/symphony	777		●	●	●				●	
/(Desired shared directory)/data_relay_storage/conductor	777		●	●	●				●	
/(Desired shared directory)/data_relay_storage/ansible_driver	777		●	●	●				●	
/(Desired shared directory)/data_relay_storage/cobbler_driver	777		●			●			●	
/(Desired shared directory)/ita_sessions	777								●	
/(Desired shared directory)/ita-root/temp	777		●						●
